

FOR IMMEDIATE RELEASE

Mountain View, CA

Chesapeake Technology Announces Several New SonarWiz Training Dates in 2019

Chesapeake Technology Inc. will be holding several training workshops this spring, summer and fall. Classes are two or three days long and breakfast, lunch, snacks, sample data sets and two week demo licenses are provided. Travel and accommodations are not included in the registration fee.

Spring training will be held May 14-15, 2019 at Stockton University, Atlantic City campus in New Jersey. We will show new features in SonarWiz 7.4 and cover sidescan, sub-bottom, bathymetry and mag processing. Cost is \$495.00 and discounts available for users with current EMAs. [Register online](#) today to secure your spot.

Summer training will be held Aug 14-15 in Port Coquitlam, BC, Canada at Kongsberg Mesotech offices. This training is limited to 12 trainees and the cost to attend is \$395.00. It will feature the latest version of SonarWiz and focus on sidescan, single beam and multibeam bathymetry. Please [register](#) here soon to assure a spot.

Fall training will be held Dec 10-12 at a location in the Eastern United States to be determined soon. Registration for the three day course will cost \$695.00 and will cover sidescan, sub-bottom, bathymetry, magnetometry processing and a data collection day on the water.

Chesapeake Technology, Inc. is a privately held company based in Mountain View CA. SonarWiz software is used by hundreds of clients worldwide, including NOAA, USGS, Fugro, Oceaneering, leading academic institutions, and many of the world's navies.
