

FOR IMMEDIATE RELEASE

Chesapeake Technology Announces SonarWiz Update to Support Trittech's New Starfish Sonar Models

Mountain View, CA, October 21, 2010 – Chesapeake Technology, Inc. (CTI), the innovation leaders in sonar data acquisition and processing software, today announced an updated SonarWiz 5 interface to support the new Starfish 990 and 452 Seabed Imaging Systems that were just announced in September by Trittech International. (see [Trittech's announcement](#).)

“Thanks to our excellent working relationship with Trittech, we were able to update SonarWiz 5 in very short order once these new side scan sonar models were announced,” commented John Gann, CTO and founder of Chesapeake. “These new Starfish towfish offer higher resolution and higher frequencies than earlier models and we know our customers will be pleased to be able to take advantage immediately of these new features through SonarWiz 5.”

This update builds on the long-standing success CTI has had supporting the Trittech Starfish 450 with both real-time data acquisition and post-processing that increase productivity, simplify sonar mapping missions, and produce very high-quality results. Customers interested in learning more about the updated SonarWiz software that supports the new Starfish interface are encouraged to contact their Chesapeake Technology representative.

About Chesapeake Technology, Inc.

Chesapeake Technology, Inc. (CTI) has been offering custom software and hardware solutions, as well as thought-leading consulting services to the marine geophysical and geological survey industry for over 20 years. CTI's SonarWiz 5 provides leading-edge sonar data acquisition and processing software for side scan and sub-bottom sonar systems being used by hundreds of clients worldwide, including most of the world's navies, NOAA, USGS, Fugro, C&C Technologies and leading academic institutions worldwide. CTI is privately owned and located in Mountain View, CA. www.chesapeaketech.com.
