FOR IMMEDIATE RELEASE

Chesapeake Technology, Inc. Releases 3D PDF Export Feature with Quarterly SonarWiz Update
3D PDFs allow for sharing & collaboration without software keys

Mountain View, CA (November 3, 2014) – Chesapeake Technology, Inc., (CTI) is pleased to announce a new capability for its flagship product SonarWiz that allows users to easily share 3D views of their datasets with clients and the public.

The new 3D PDF exporting feature enables users to harness the capabilities of the PDF standard to help visualize the extents of their dataset. No longer will simple screenshots suffice when a client can zoom in, out and navigate through an interesting sonar feature simply by interacting with a PDF – and without needing a software key. Subbottom, sidescan, and bathymetry data can all be visualized in the 3D PDF. This feature is available on SonarWiz past version 05.06.0064. An in-depth tutorial about the new feature is available through Chesapeake Technology's website here.

"This new 3D pdf export functionality enables and encourages true collaboration for our SonarWiz users and their colleagues. We're quite proud of the feature and have seen a lot of adoption already," said John Gann, lead developer and co-founder at Chesapeake Technology, Inc.

Chesapeake Technology Inc. is committed to ongoing improvements to its SonarWiz mapping software and has several new releases monthly. The new 3D PDF feature and many others are the result of customer requests. The new release of SonarWiz is free to all customers who have an extended maintenance agreement. To learn about the more than 60 enhancements released to production over throughout the third quarter, see our Quarterly Highlights here.

About Chesapeake Technology, Inc.
Chesapeake Technology, Inc. (CTI) has been offering sonar mapping software, custom solutions, and thought-leading consulting services to the marine geophysical and geological survey industry for over 20 years. CTI's SonarWiz provides real-time sonar data acquisition and processing software for side scan and sub-bottom sonar systems being used by hundreds of clients worldwide, including most of the world's navies, NOAA, USGS, Fugro, C&C Technologies and leading academic institutions worldwide. CTI is privately owned and located in Mountain View, CA
