

FOR IMMEDIATE RELEASE

CTI Announces December 2013 SonarWiz Training Seminar Details

Chesapeake Technology Inc. (CTI), a leader in software for the acquisition and processing of sonar and magnetometer data, has finalized the details for its yearly training seminar on its flagship software suite, SonarWiz.

It will be held at Cape Fear Community College in Wilmington NC on December 10 thru 12. This is a must event for new users, experienced users, and those that need a full understanding of data processing. Attendees will become fully acquainted with all the capability of SonarWiz including many new features.

Learn how to create stunning sidescan sonar mosaics, process magnetometer data, process sub-bottom profiler data and do change detection for MCM and Port Security. It is very hands- on so bring your own laptop - data will be provided so you can, step by step, you experience using the software to its fullest. The seminar has several instructors to help those who need extra one on one support. This seminar always gets very booked so reserve your spot early.

For more details call CTI at 650-967-2045 or via email at info@chesapeaketech.com.
