CTI Announces New Bundled Pricing that Delivers Discounts of up to 35% to SonarWiz Users

Price change designed to make it even more affordable to use SonarWiz on a wide range of sea floor mapping missions

In a major initiative designed to facilitate the use of SonarWiz software across all major sea floor mapping applications, Chesapeake Technology has introduced new pricing that provides SonarWiz users with discounts of up to 35%.

"Many of our larger customers use a variety of different sonar hardware," said John Gann, VP of Engineering. "They've asked for an affordable 'all-in-one' solution for data acquisition, analysis, and post-processing that they can use regardless of which sonar they select for a given survey. SonarWiz is already the industry's leading sea floor mapping solution; we've now made it even easier for customers to use it for more applications."

Organizations who seek to use SonarWiz for bathymetry, sidescan, sub-bottom, and magnetometer applications can take advantage of the 35% discount effective immediately. Users who renew a lapsed maintenance agreement by the end of 2016 are also eligible to upgrade to the full version of SonarWiz—which works with all major sonar categories—at a significant savings.

"We wanted to make it easier for survey companies, government agencies, and other organizations to be able to take advantage of the full range of SonarWiz's data acquisition and post-processing capabilities," said David Finlayson, CTI Chief Scientist.

SonarWiz users will have the capability to work with virtually all the industry's leading sonar system suppliers, including BathySwath, C-MAX, Edgetech, GeoAcoustics, Klein, Knudsen, Kongsberg, Imagenex, Marine Sonic, Ping DSP, SonarBeam, Syqwest, Teledyne Odom, Tritech, Reson, and R2Sonic.

About Chesapeake Technology, Inc. Chesapeake Technology, Inc. (CTI) has been offering sonar mapping software, custom solutions, and thought-leading consulting services to the marine geophysical and geological survey industries for over 20 years. CTI's SonarWiz software provides real-time sonar data acquisition and processing for sidescan, sub-bottom, bathymetry, and magnetometer sonar data used by hundreds of clients worldwide, including many of the world's navies, NOAA, USGS, Fugro, C&C Technologies, and leading academic institutions. CTI is a privately owned company located in Mountain View, CA.
